

CHANDRAKANT DUBEY

Software Engineer

Mumbai, Maharashtra

 LinkedIn |  GitHub |  Portfolio

Professional Summary

Full Stack Software Engineer with 3+ years of experience designing and developing enterprise-grade web applications using Python, FastAPI, Node.js, React, TypeScript, PostgreSQL, and Oracle Database. Experienced in building scalable REST APIs, cloud-native applications, ML-powered platforms, and CI/CD pipelines using Docker and AWS. Passionate about backend engineering, system design, AI integration, and high-performance distributed systems.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL

Frontend: React.js, Next.js, Redux, React Query, Tailwind CSS, HTML5, CSS3

Backend: FastAPI, Node.js, Express.js, REST APIs, WebSockets, Socket.IO

Databases: PostgreSQL, Oracle Database, Redis, MongoDB, SQLAlchemy

Cloud & DevOps: Docker, AWS EC2, AWS S3, GitHub Actions, CI/CD, Linux (RHEL)

Tools: Git, GitHub, VS Code, Postman

Professional Experience

Adeptken

Full Stack Engineer

Jan 2026 – Present

Mumbai, Maharashtra

- Designed and developed an enterprise Performance Review Management (PRM) platform for IDBI Bank using React, Node.js, and Oracle Database, replacing spreadsheet-based workflows.
- Architected and implemented an ML Inference Platform for customer risk assessment using Python, FastAPI, React, and Oracle Database with secure authentication and enterprise deployment.
- Developed an internal lead management platform (POOL) using Python, React, and Oracle Database, deployed on Red Hat Enterprise Linux (RHEL).
- Built an enterprise communication platform (Samvad Sambha) using React, Node.js, and Oracle Database to streamline internal collaboration and workflow management.
- Designed scalable REST APIs, implemented Redis caching, optimized frontend data fetching with React Query, and automated deployments using Docker, AWS EC2, GitHub Actions, and CI/CD pipelines.

Nutriiya

Full Stack Engineer

Sep 2025 – Dec 2025

Mumbai, Maharashtra

- Developed enterprise full-stack features using React, Next.js, Node.js, and FastAPI microservices for scalable business applications.
- Designed and implemented REST APIs, middleware, validation pipelines, and caching layers to support high-volume data processing.
- Built reusable frontend components and backend modules, improving code maintainability and development efficiency across projects.
- Integrated React Query and SWR to optimize client-side caching, asynchronous data fetching, and state synchronization.
- Contributed to containerized deployments and CI/CD pipelines using Docker, AWS EC2, and GitHub Actions.

Kintree Pvt. Ltd.

Full Stack Developer

Nov 2024 – Jan 2026

Mumbai, Maharashtra

- Developed interactive family tree visualizations using React, Redux, and BalkanJS with optimized rendering for large hierarchical datasets.
- Built backend services using Node.js, Express.js, and Socket.IO to enable real-chat and collaboration and live updates.
- Integrated Google Maps APIs and geolocation services to support location-aware features and interactive mapping.
- Collaborated on backend Django API redesign, improving response times, scalability, and overall application performance.

- Developed and maintained production-grade e-commerce and loyalty management applications using React, TypeScript, Node.js, and Express.js.
- Migrated legacy JavaScript applications to modern TypeScript-based architectures, improving maintainability and developer productivity.
- Optimized API integrations, database interactions, and frontend performance through caching, lazy loading, and code splitting.
- Collaborated in Agile teams, performed code reviews, improved test coverage, and contributed to CI/CD and release workflows.

Projects

Machine Learning Inference Platform | *Python, FastAPI, React, Oracle Database*

- Designed and developed an enterprise ML platform for customer risk assessment with secure authentication, model execution, and result visualization.
- Built scalable REST APIs using FastAPI and integrated Oracle Database for enterprise data management.
- Containerized the application using Docker and deployed it on Red Hat Enterprise Linux (RHEL).

Pokédex RPG Backend | *Python, FastAPI, PostgreSQL, SQLAlchemy, Docker*

- Developed a production-style REST API with layered architecture using FastAPI, PostgreSQL, and SQLAlchemy.
- Implemented JWT authentication, role-based access control, and complex RPG mechanics including Pokémon stats, breeding, evolution, and experience calculation.
- Containerized services with Docker Compose and optimized asynchronous API performance using Uvicorn.

Open Source Projects | *Python, React, Node.js, FastAPI*

- Developed multiple full-stack applications demonstrating REST API design, authentication, database modeling, React architecture, Docker deployments, and enterprise software development practices.
- Built reusable backend architectures following clean architecture principles, modular design, and scalable project structures.

Education

MIA Digital University
Master's Diploma in Computer Science & Technology
Savitribai Phule Pune University
Bachelor of Engineering in Mechanical Engineering

2022 – 2023
Online
2015 – 2019
Maharashtra, India

Certifications

Next.js — Udemy (2024)
Meta Front-End Developer Professional Certificate — Coursera (2023)
Full Stack Web Development — Newton School (2023)
Python Programming Masterclass — Udemy (2022)
